About

Experienced full-stack developer passionate about creating performant, and user-friendly products from conception to delivery. Skilled in UI/UX design, front-end development, middleware, and backend. Strong background in front-end security, performance optimisation, and serverless cloud solutions.

Experience

Comunet

Full-Stack Engineer

Feb 2026 - Present

- Worked with international clients to streamline their software and hardware integration for field operations.
- Led changes to existing integrations in Azure connecting with multiple development teams.
- Optimised large scale SQL Queries for data aggregation and transformation.

Coviu

Full-Stack Engineer

May 2025 - Nov 2025

- Delivered customer-facing features in a fast-growing company, collaborating closely in a small, high-ownership team.
- Built a video and voice platform using WebRTC, Twilio, and Krisp, with emphasis on reliability, clarity, and ease of use.
- Developed highly performant front-ends, APIs, and database layers distributed in AWS across Australia and United States.
- Developed a POC incoming call reminder using React Native.

Aligent

DevOps Engineer

April 2024 - May 2025

- Responsible for deploying scalable and highly available ecommerce infrastructure using AWS and Adobe Commerce.
- Developed internal tooling with intuitive UIs, streamlining developer workflows.
- Optimised static and server-side web hosting in AWS, reducing costs using serverless technologies.
- Used security OWASP, Aikido, npm auditing to safeguard front-end applications.

Chamonix IT

Integrations Developer

Feb 2023 - April 2024

- Designed and deployed a highly scalable Azure solution using Terraform, while ensuring stringent security measures using secure networking and Prisma Scan.
- Automated deployments of Azure resources and front-end environments through DevOps Pipelines.
- Collaborated with clients to define and implement front-end integrations, ensuring seamless API communication using Angular, C#, and Azure SQL.
- Facilitated seamless migration of client data to Azure, optimizing accessibility and integrity using Function Apps, Azure SQL, and a C# API.

Full-stack Developer

Feb 2022 - Jan 2023

- Led UI/UX Design in Figma, delivering intuitive interfaces for web, mobile, and tablet.
- Designed, developed, and deployed an Angular front-end, integrated with a C# and MSSQL backend, dockerised and hosted in Azure Containers.
- Ensured best security policies using OWASP, Jasmine, Azure WAF.
